

SOFT-PACK®-SYSTEM „Med“ 2021

Gently embraced, relaxing weightlessly. Treatment table with therapeutic effect.

More than 30 years ago, Kurland invented the Soft-Pack®-System, which established an international standard for effective full-body wraps. The unique feel-good experience and the positive effect on skin and muscles make the treatment table so indispensable for practices, therapists and wellness areas. Wrapped in comforting warmth and in an almost weightless state, guests relax in the Soft-Pack®-System. The gentle water pressure causes the membrane to nestle against the body, creating an occlusion effect that increases the skin's ability to absorb active ingredients by up to 10 times. The Soft-Pack®-System adapts ideally to the body, providing relief for the entire supporting apparatus and ergonomically perfect positioning of the spine. The well-engineered system combined with high-quality chrome-nickel steel and the super soft, durable membrane guarantees a solid system with long durability. Furthermore, you benefit from the ready to plug-in delivery and easy installation. Neither a water supply nor a compressor are necessary!

The Kurland system, which has been tried and tested thousands of times, deliberately dispenses with distracting features and allows you to "let yourself go" and enjoy absolute deep relaxation.

The advantages

- Made of chrome-nickel steel, which guarantees long durability
- Wide range of colours available for the cover
- Padded top edge for a comfortable getting in and out (also for elderly guests)
- New lifting technique with no compressor needed any more. Cost saving!
- Ductile, soft membrane which feels very gentle and secure
- The Soft-Pack®-System "Med" is delivered ready to plug in
- Low operation costs allow a very good cost-benefit ratio
- Simple change of the membrane. No need to spend money on service
- Very flexible in treatments: anybody wrap treatment is possible

The accomplishment

Tub body made of chrome-nickel-steel with integrated hydraulic disappearing bench, incl. electrical heating. The control cabinet is integrated in the tub. The cover is made of carefree skai-leather. Easy to handle via a control panel being integrated in the cover. Incl. electronic temperature control. The tub is accomplished with four feet and can be placed free within the room.

Dimension: external dimensions approx. 2310mm (91") x 1060mm (42") x 650 mm – 900mm (26" – 35") (Length x Width x Height)

Dimensions lying surface approx. 2050 mm (80") x 790mm (31")

Weight: Bed without water approx. 180 kg (395 lb)

Filled with water approx. 690 kg (1,520 lb)

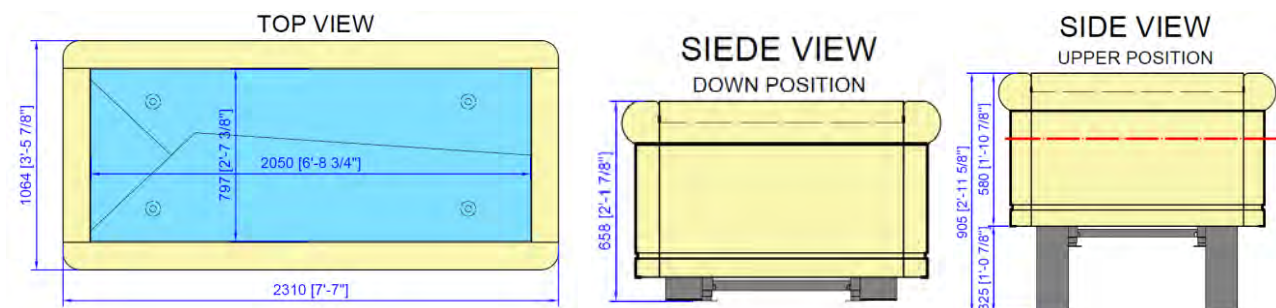

Lifting capacity (maximum weight of the person): approx. 200 kg (440 lbs)

Load capacity of the lying surface: approx. 200 kg (440 lbs)

Colour: Cover: Skai-leather according to our colour chart (different colours) 9 Standard colours.

Membrane: beige (similar RAL1011 brown beige) or roma (similar RAL1013 pearl white)

Drawings:

Please note: the electric lifting mechanism: extension to a liftable massage table is an option!

Power Supply:

Single-phase supply CEE-socket (3-pins) 230V AC / 50 Hz / 1x 16 A; Power 1.800 Watt

USA: 1-phase supply line 110-120 V AC / 60 Hz / fusing 1 x 16 A; Power 1,800 Watt

Electric Energy Consumption:

approx. 6,75 kWh per day;

approx. 0,12 kWh per treatment (25 Minutes);

OPTIONS:

Electric lifting mechanism: extension to a liftable massage table

With the integration of our innovative lifting technology, you can easily transform the Soft-Pack®-System Med into a treatment table for effective massages. Because this technology ensures that the Soft-Pack®-System can be raised to a maximum height of approx. 870 mm (standard height: approx. 650 mm). This is the ideal height for massage applications. Lifting is done by 4 electric TL17 lifting columns. Constructed with an extruded aluminum rectangular appearance, our TL17 lift column provides a high degree of stability. The 3 stage, telescopic design provides a greatly reduced retracted height and an increased stroke length.

General features of each TL 17:

- Max. load 2,000N (push)
- Lifting capacity (maximum weight of the person): approx. 130 kg (280 lbs)
- Max. dynamic bending moment 250Nm
- Max. static bending moment 500Nm
- Max. speed at max. load 11.5mm/s
- Max. speed at no load 41mm/s
- Retracted length ≥ Stroke / 2+150mm
- IP rating IPX6

The electrical lifting consists of:

- 4 units TL17 electric lifting columns 3 stage, telescopic design
- hand switch with cable installed on the Soft-pack cladding
- Control unit for the TL17 lifting columns

SOFT TOUCH – gentle "touch" through flow nozzle technology

The new diversity of the Kurland Soft-Pack®-System

SOFT TOUCH represents an innovative flow nozzle technology.

With the jets integrated in the Soft-Pack® lying surface, shoulders and back can be gently "touched" with a jet of water at a programmed interval.

Price € 5.379,75

Soft music

Feel the music!

Enjoy a treatment in our Soft-Pack®-System with relaxing music. You not only listen to the gentle sounds, but also feel the pleasant vibrations of the integrated oscillator. The music system consists of an oscillation technique, incl. amplifier, electric supply and MP3-Player with relaxing music.

Price € 1451,25

Water refilling device

Easy refilling – with no need to remove the cover

The water level of the Soft-Pack®-System should be checked regularly and, if necessary, you have to refill water. To keep the time for this effort at a minimum we recommend our easy-to-handle water-refilling device.

Price € 67,37

Build-in heater unit for product preparation

For an optimal treatment result, all pasty or liquid products should be heated to a pleasant temperature prior to application. For this purpose, we recommend our built-in preparation unit. The unit consists of a basin with four inserts with handles made of stainless steel (V2A), incl. a temperature control button. To be installed within a preparation desk.

Dimensions: L/W/H approx. 57,5/37,5/25cm

Weight: filled with water 25 kg

Control panel: W/H approx. 15,6/8,6cm

Electrical Supply: 230 V, max. 0,7 kW
